List of Figures

3.1	Create trello board	2
3.2	Create discord server	3
3.3	Assign exam committee user story	4
3.4	Semester progress tracking user story	5
3.5	SRS Documentation	6
3.6	Developing feature-Assign exam committee	6
3.7	Developing feature - Semester progress tracking (Chairman)	7

1. OVERVIEW

The Academia Project is an academic activity management system that aims to streamline and manage academic activities of a specific department or university by providing tools for class scheduling , performance tracking, course management and exam committee assignments. During the development phase of the project, I actively participated in defining the problem domain, group discussions, listing out user story, developing features, selecting documentation tool, creating the continuous integration process and developing features from user stories.

2. SUMMARY OF PROJECT CONTRIBUTION

During the development phase of the project, I contributed in various activities that was required by my team leader to carry out the project development smoothly. Below my contributions of the project is listed out :

- Created Trello workspace and invited team members
- Created discord server for effective communication between team members
- Participated in generating functional requirements
- Created user story for specific features
- Participated in SRS documentation
- **Explore and set documentation tool for the project**
JSDoc is selected as the documentation tool for the project because we are using JavaScript for developing our backend logic for the project

- **Explore and implement the continuous integration tool for the project**

GitHub Actions is used as the continuous integration tool in project because we are using GitHub for as our repository and GitHub Actions is very convenient to use.

- **Develop features of the project**

The features that I developed in this projects are :

- Assign Exam Committee

Chairman or admin of the system can assign exam committee members to a specific semester

- Semester Progress Tracking

Frontend of the chairman where he/she can see the progress of different active semesters

3. VISUAL EXAMPLES OF PROJECT CONTRIBUTION

- Created Trello board.

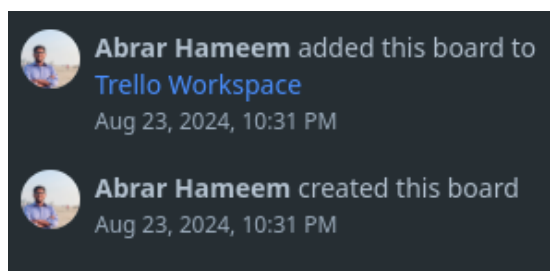

Figure 3.1: Create trello board

- Created discord server.

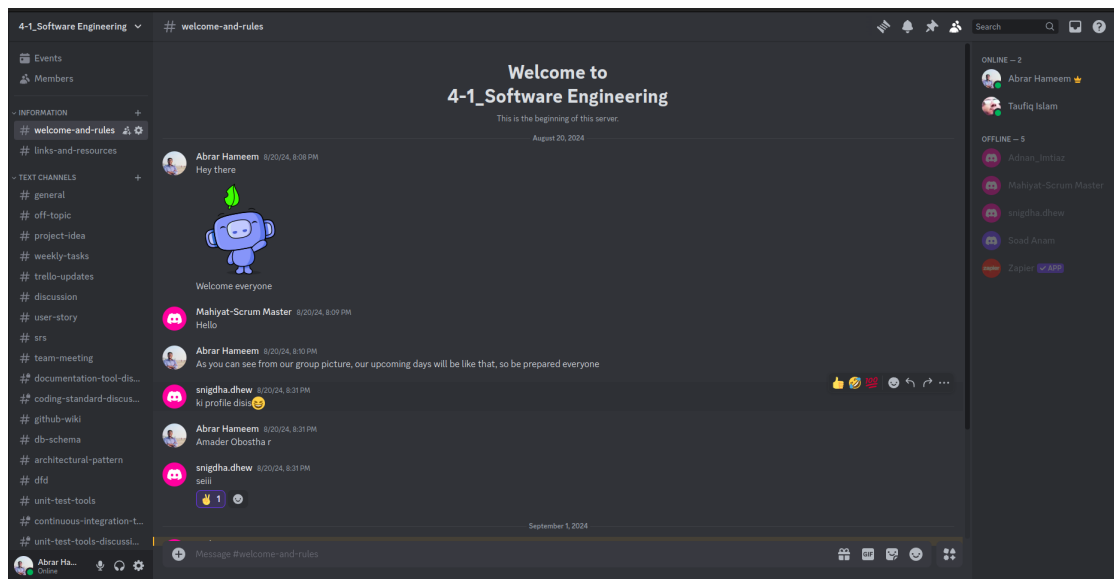

Figure 3.2: Create discord server

- Generate User Stories

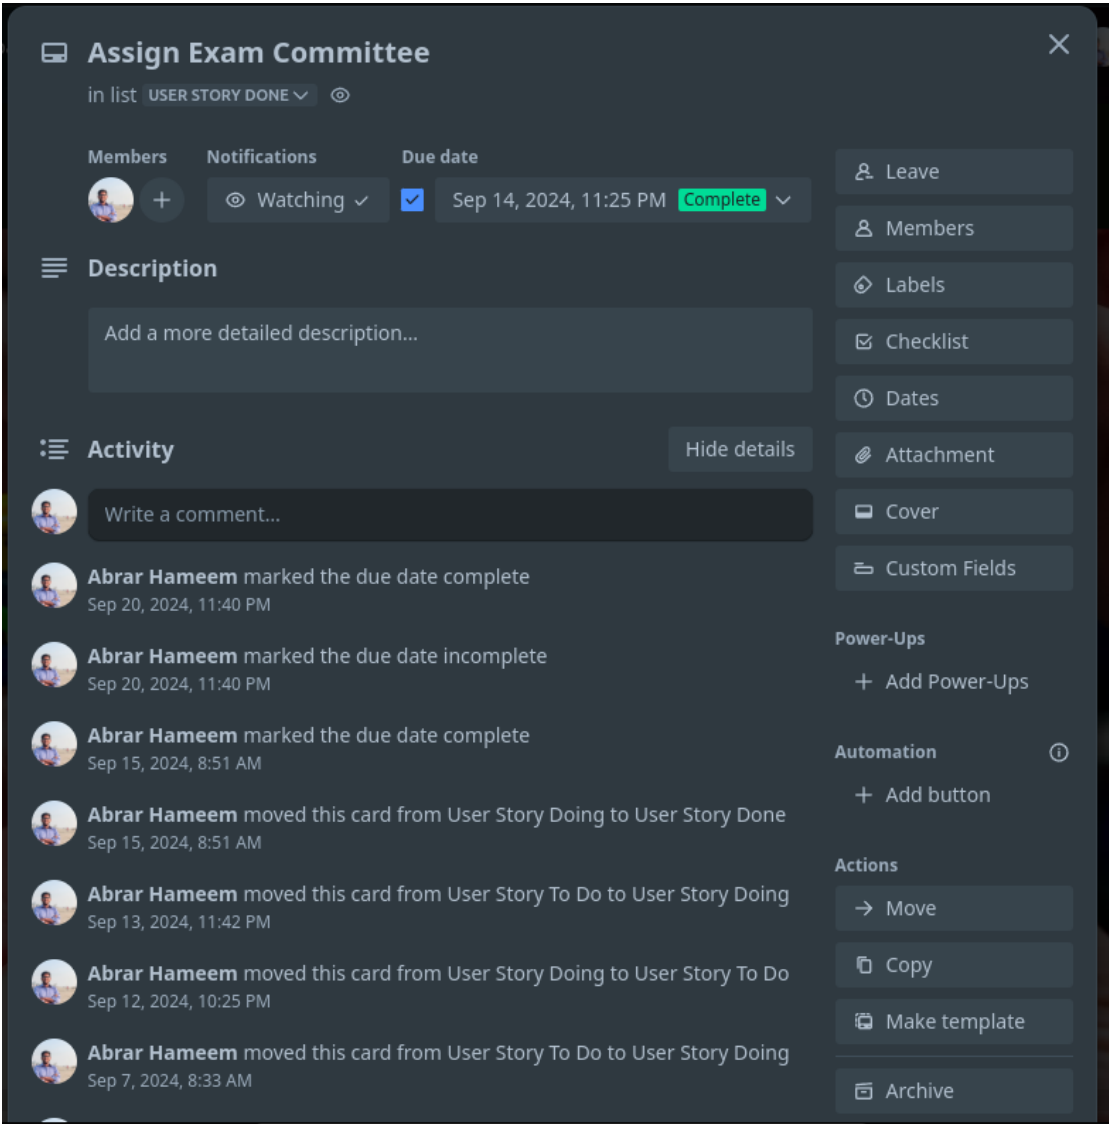

Figure 3.3: Assign exam committee user story

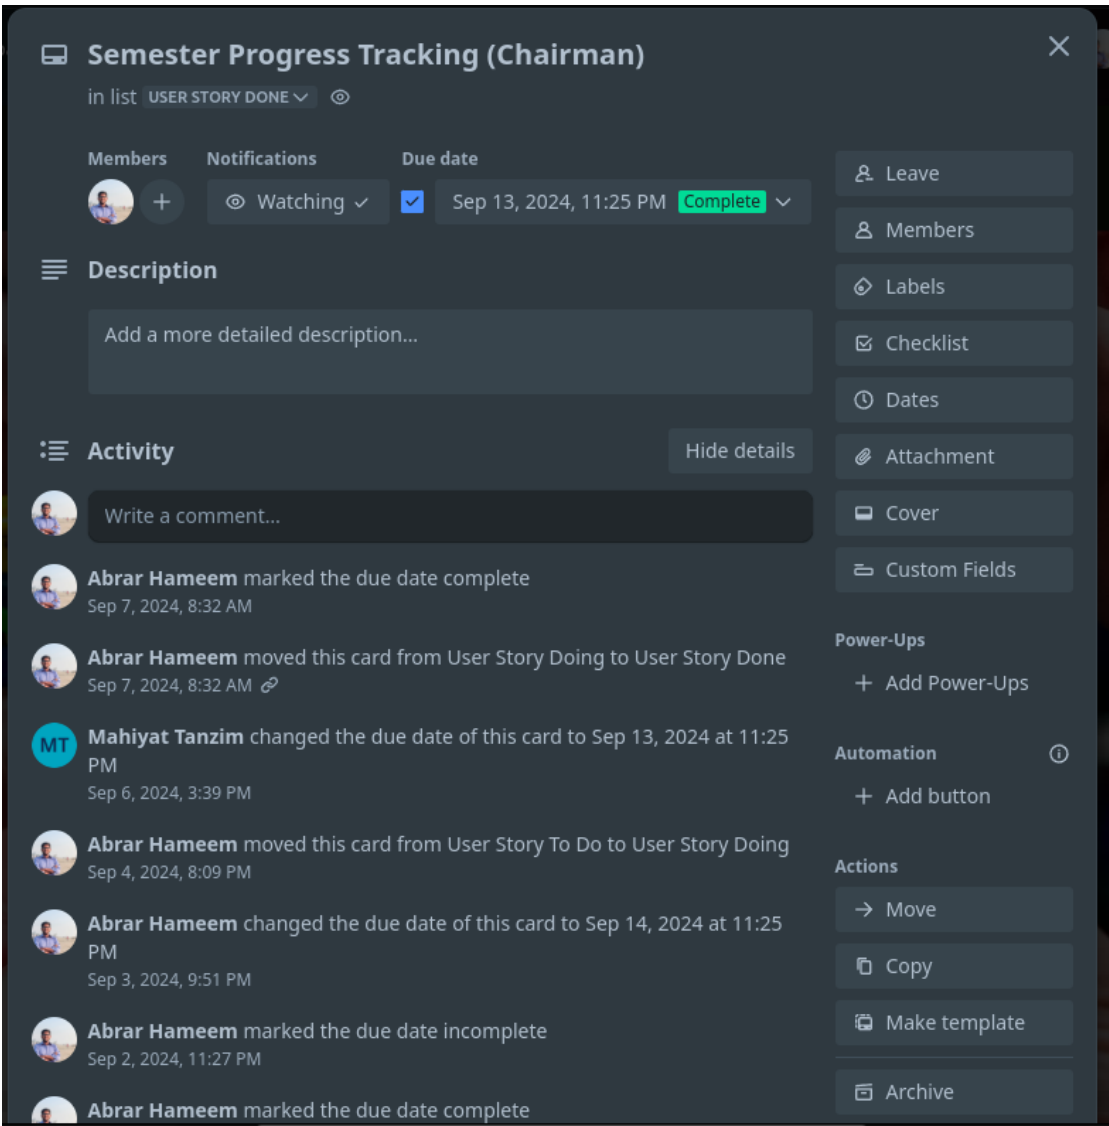

Figure 3.4: Semester progress tracking user story

- Contribution to SRS documentation

Figure 3.5: SRS Documentation

- Developing features
Assign Exam Committee

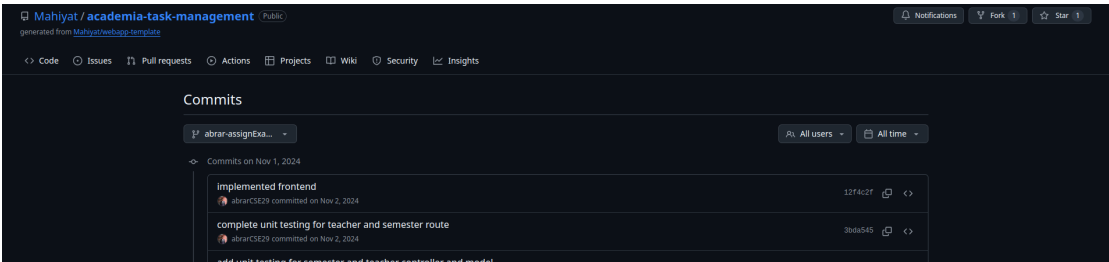

Figure 3.6: Developing feature-Assign exam committee

- Semester Progress Tracking - (Chairman)

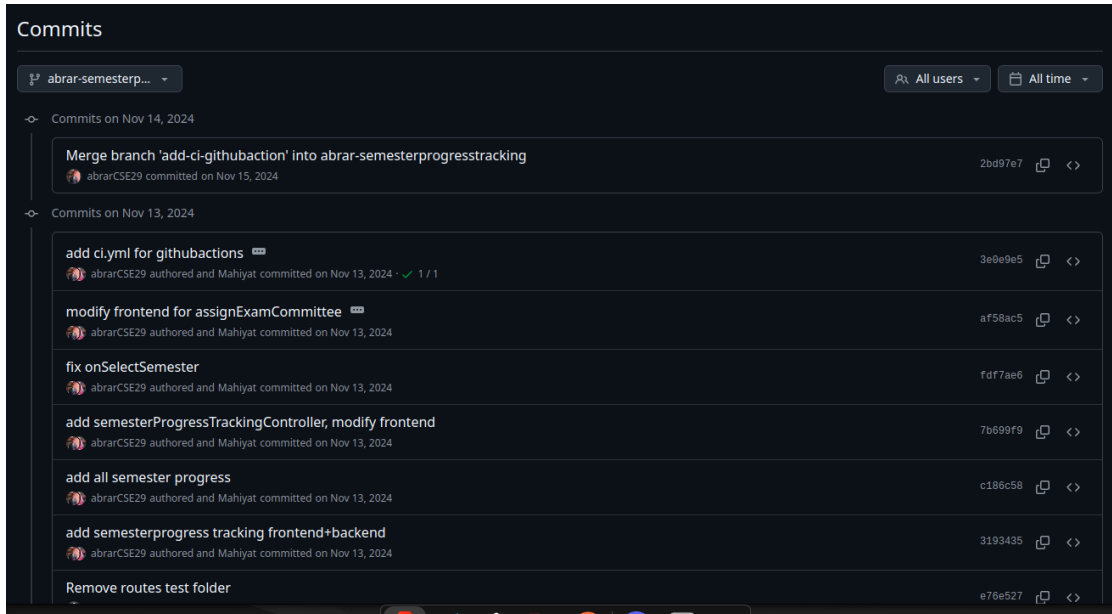

Figure 3.7: Developing feature - Semester progress tracking (Chairman)

4. DISCUSSION ON USE OF METHODS AND TOOLS FOR THE EFFICIENCY OF THE PROJECT

Tools that have been used in this project.

- **Trello** - for project progress tracking and assigning tasks
- **Discord** - for effective team collaboration and communication
- **VS Code** - IDE selected for development
- **GitHub** - for storing code in remote repository
- **GitHub Actions** - for implementing CI/CD
- **JSDoc** - for documentation purposes
- **Ollama** - for AI report generation

- **git** - for version control system
- **GitHub Wiki** - for documentation of the project
- **Toggle** - for time management and tracking active time for each team members
